

BREAKING THE BOUNDARIES OF COMMUNICATION

Breaking the boundaries of communication.

When we started to work on Limtel's services, one aim was established - creating simple, useful and good priced instruments for every businessman. Our services use the brand new technologies combining both telecommunication and IT. It is our pleasure to introduce you to the Limtel's offer prepared especially for business purposes. Our services are helpful in sales, marketing and a contact with a Client. We hope, that this catalogue, will guide you through our services and surely help you to make the right choice.

Sincerely,

Szymon Piekarz
The chairman (Strategy and Marketing).

Delivering the innovative solutions.

The wide range offer provides the instruments that integrate any solution with your IT system.

Thank to Limtel, one can easily save on employing the consultants or avoiding high expenses of the call center and lecturer services. Our purpose is to prove that VoIP is not only a way of reducing costs but it is also a perfect technology that immediately creates professional solutions. The integrity with the existing applications or websites is really incredible. Adding the infoline to the internet shop or creating the possibility of calling directly to CRM system is now in the range of even small companies.

We invite you to explore our catalogue for more information about IT integrity systems.

Sincerely,

Grzegorz Siehien
Vice-chairman (Development and Technology).

INTERNET SERVICES

breaking communication
boundaries

Who we are?

We started to work on the Limtel's platform in 2009. One aim was established-creating the new view of telecommunication and reducing the costs. To provide the best business and technological solutions, we invited people from the world of IT, telecommunication and business. Brand new, revolutionary, worldwide products have been born.

Limtel was made from passion and it has developed due to the market needs.

Limtel is not an ordinary internet application. It is a platform that enables building your own solutions. We have been heading for our services to be available anywhere and without entrance costs. SaaS (Software as a Service) enabled virtualization of our solutions letting the Client create, use and buy the application without walking away from the computer. The Limtel's Platform is a mix of many complicated technologies that can be unavailable to an average user and even programmer because of the knowledge barrier, technologies or financial aspects. The model of a Cloud eliminated some of these barriers. Moreover, authorised programming language was introduced. The Client can write its own application in a very simple way in a few minutes. Our services are available on the spot- you can call the prepared number right now without waiting and formalities.

Limtel is not only a platform for building ICT solutions but it is a number of solutions that combine all of our system possibilities.

Each of them is a ready-to-go application. Everything is prepared in such a way that you could control the spendings easily. We unceasingly create new solutions that we put into effect. We hope that you will give us a chance and try out our innovative and good priced ICT solutions!

An easy access:

You can log in to all of our services using the same login and password.

Clarified solutions:

You will have one, shared financial account to all of our services.

Individual approach:

Every single service can be adapted to your needs. Just contact us so that we could prepare a special offer just for you.

HELPING YOUR SALES

One of the key elements of company's development and existence is an influx of new Clients. Limtel has prepared a number of tools for you that will help to get them.

Voice Sms

TeleOpinionBar

LimSMS

LiMail

What are our services typical for:

One of the lowest call prices on the market.

We have a wonderful news for you. Thank to us you will inform 1000 brand new potential Clients about your service or product from 29 pln net. Choose your best communication channel for your company: use the VoiceMail, SMS/MMS or e-mail, opinion bar or fax.

Integrated surplus services such as speech synthesis.

We want you to have an influence on the advertisement. That is why, in the price of every service, we give you a range of other possibilities. Thank to them, you can use the best speech synthesiser in the world IVONA, recorded and defined Voice Sms or the tools that estimate the effectiveness of your campaign.

You will find out if your campaigns have reached the goal.

We want you to know about the effectiveness of the campaigns you lead. Our every solution enables an exact spying of the results and detailed report actions.

Limtel operates in a few European Countries offering a range of services on the international markets at the local prices. If you lead or going to lead a campaign on other market then Polish, contact us so that we could offer you a very good price.

250 pieces

VOICE SMS

is a successful marketing tool.

1

Choose your phone number. You have hundreds of phone numbers from any area zone.

2

Record your Voice Sms. The text will be transformed into the speech via synthesizer.

3

Introduce the phone numbers just by 1 click and start the calling campaigns.

4

Observe the results regularly on the diagram and after all, download or send a report.

Voice Sms is the most common marketing tool.

Voice Sms services are the effective tools that make preparation and leading the campaign available on a group of people.

What are the advantages of the Voice Sms?

- ❖ Generating Voice Sms thank to the best software in the world. Text to Speech .Completely, automatically and at the same price.
- ❖ You can dial a number from any city so that the campaign could be led.
- ❖ The possibility of relistening or recalling of the Voice Sms.
- ❖ No regular fees. The payment is only for the campaign that has been already led.
- ❖ The possibility of introducing your own list of Clients in XLS file, TXT, CVS, XML.
- ❖ Generating reports live, full filtering and statistics.
- ❖ Detecting system of the answering machines or internal numbers that enables to save on the pay phones connections.

Hello Stefan Kowalski, we have an awesome offer for you. 10 % discount for our carwash services. If you are interested, press 1 so that we could send a promotion coupon straight on your cell.

An example:

Personalized Voice Sms can contain the text that is known for the Client for ex. name and surname. It can also gather immediate opinions about the Client's mood and automatically send a promotion coupon.

Do you know?

TeleOpinionbar

TeleOpinionbar from

36

gbp net
250 pieces

FIND OUT MORE
about your Client preferences.

1

Limtel answers or calls with the prepared opinion bar. The calls are placed on the given state or cell numbers.

2

It passes forward the question to the Client and asks for the answer on the keyboard.

3

The receiver answers via pressing the key. It will be sent to the Limtel's system that will pass forward the results.

4

Observe the results of the campaign on the diagram and download or send a report.

Opinion bars have never been so simple.

Thank to TeleOpinion bars you can easily run a poll on users at any phone numbers. Our systems have been designed in two ways: calling and answering the caller's information. Use the TeleOpinion bar to build up the Clients'satisfaction, run the market opinion polls or popularity set. The results can be transferred to our IT system where you can see the statistics regularly.

What do the TeleOpinion bars mean to you?

- ❖ A very simple and quick opinion bar using only state or cell phone.
- ❖ Making or answering calls with the same question.
- ❖ Transferring the results to the Limtel's system on your own.
- ❖ Get the reports any time you wish.
- ❖ Full independence of your IT system.

This is safe:

- ❖ The phone numbers redirected between the polls are used only for connection.
- ❖ If you use your own IT system, Limtel will not save any key polls for you.
- ❖ Limtel API does not save any data transferred via outdoor system except phone number which is used for billings and settlements.
- ❖ An authorisation is based on a special key integrated with the Client's host.

„Hello Stefan Kowalski. We have a question for you. Have you tried a brand new Napojex drink? If yes, press 1, if not press 2, if you wish to leave an opinion press 3, if you wish to connect with the consultant press 4,,

An example:

Do you know?

TeleOpinion bars like Voice Sms can be personalised. All of the sequences can be said by the lecturer or synthesizer. The opinion bars enable to gather opinions (possibility of relistening on the website) and direct connection with the infoline center of your company.

LiMail

One e-mail only from

0,01

gbp net

SEND MASS E-MAILS WITH 99% OF THE EFFECTIVENESS

Verify the effectiveness of your advertisement campaigns.

1

You set up the campaign and write the text.

2

You give the e-mail addresses.

3

The system sends e-mails, you watch the campaign statistics. At the end you can get or send a report.

Why LiMail?

Our service sends mass campaigns based on the mailbox in a very simple way. LiMail will lead you through preparation of the suitable text step by step so that it will meet the criteria of the commercial message. Your e-mail will not be classified as spam. Moreover we provide a report infrastructure which will present the statistics of the campaign effectiveness and concrete actions by user in details.

LiMail advantages:

- ❖ Advanced campaign management system with a creator that will lead you step by step through the whole process.
- ❖ Signed and authorised messages sent by a number of commercial servers, preventing spam qualification. The effectiveness of the delivery is up to 99 %.
- ❖ The full reports of the effectiveness include: the number of delivered, rejected, displayed and clicked messages.
- ❖ The full personalisation of the messages. Get an Excel file from the address and the name you want to give. Then you can personalise every mass message or send the special, unique promotion codes.
- ❖ Graphic PDF reports that you can pass on to your Clients.
- ❖ The spam analyzer will point what you should change in your message so that it is not qualified as spam.
- ❖ Full data protection.

Sending messages from your letterbox or stationary programme, the effectiveness of letter delivery is only 25%.

INTEGRATED TELEMARKETING CENTER

from the website level.

1

Create your own Client data base. One click means any number of positions for telemarketers

2

Your telemarketers can start calling campaign due to the automatic campaign schemes.

3

Control and relisten the calls of your employees so that the situation in your company is clear.

The active TeleMarketing cutting the new Client's costs.

The marketing tools were created to satisfy the company's needs of using the phone as a tool of product&service sales. Thank to our platform you will be able to run both small and big telemarketing centers.

The screenplay.

Prepare your own screenplay of the talk, specify the actions of the telemarketer and gather the information. Configure the service in such a way that enables consultant direct sale using an automatic messages E-mail, Txt message and Fax.

Diffirent models of settle-ments with telemarket-ers.

You can choose the most suitable model for you. We offer a possibil-ity of subscription settlements, charging the balance for their suc-cessful work or a number of busi-ness leads or minutes used.

Computer is all you need.

To lead the telemarketing center, a computer+head&mic is all you need. Your telemarketers can work from home, an office or available logistic centers. We can get you a special terminals so that you could create your own telemarketing management center.

Why Telemarketing?

- ❖ Managing data base of your Clients.
- ❖ Automatic calling campaigns.
- ❖ Spying telemarketers' progress.
- ❖ Control the telemarketers' tasks.

An example:

Your telemarketer logs in on the website and starts to do the assigned tasks. He calls by himself or uses an automatic dial trying to connect with the Client. He can see the history of his talk on the screen and the options that help him in selling. He can send the data to the Client by e-mail or txt message immediately. If the administrator allows, he can see the range of the products that can be sold to the Client. The administrator can specify the control parametres such as minimal and maximum lenght of the talk with the Client and minimal data to accept the effect of the talk.

Limtel can call your Client adapting the area code to local recipient. The Client will see a phone number on the screen that is suitable for the area code.

Do you know?

MODERN COMMUNICATION CHANNEL

on your website.

1

TeleButton's installation is very easy. Just copy and paste 2 lines of the generated code on the website and here you go.

2

The Client can call you now directly via the computer or laptop with head&mic.

3

After clicking on TeleButton, the Client is connected with your company's phone or asked to leave the message.

4

Your TeleButton will connect with the state phone, cell or communicator.

The easiest way of voice communication.

TeleButton is a very simple service that allow you to call your company directly from the website. TeleButton installation is really easy. Just copy and paste 2 lines of the generated code so that the TeleButton could appear on the screen. After clicking it, the Client will be connected directly to your office phone number. TeleButton does not need any other software. The only thing you need is head&mic.

What does the TeleButton allow?

- ✦ The phone connections without any additional software from the website.
- ✦ The connections with any cell number or state phone.
- ✦ Recording the calls.
- ✦ Configuration of the actions based on the specified hour.

How does it work?

You set a special applet on the website. After clicking it, any person who visits the website can communicate with you on the spot via voice. The connection is established by any channel like state phone, cell or communicator installed on your computer.

✦ TeleButton

STUDY THE EFFECTIVENESS OF YOUR ADVERTISEMENT CHANNELS

and rise up the income from the campaigns.

1

AdTrack-Name the number of the marketing channels that you are going to use.

2

Attribute each of them to the phone number.

3

Name the main infoline (your office phone number).

4

Watch the effectiveness of each channel live.

The easiest way of verifying the effectiveness of the commercial campaign.

Have you ever wondered how much money do you spend on advertisements? Preparing the ad campaign takes a lot of time and money. Moreover, lots of campaigns are not adapted to the service/product offered and the test of effectiveness limits to one sale index. The profits from the ads could be higher without additional costs by detailed verification of the actions. That is the reason we created AdTrack.

How does it work?

AdTrack enables buying and attributing a single number to every ad channel. All of the numbers lead to the agents directly or to call centers. The communication between the Client and the company goes traditionally-the only difference is that Limtel's system and AdTrack service analysis the outgoing and incoming connections. As a result it is possible to tell which sale channel give the best effects. The construction of the service rises the effectiveness control not only in the whole campaign but also in provinces of the country.

The local market phone calls.

Thank to AdTrack you can adapt the phones to a concrete media and local markets led by a numerical zone. You can also use 801 number.

Your infrastructure is not important for us.

AdTrack can be connected to present phone infrastructure. If you do not have it, we will find virtual solutions and meet your needs.

THE COMMUNICATION IN THE COMPANY

We break the boundaries of communication not only physical but also mental. We give your Client a feeling that we care of him. He is treated exceptionally and knows that his money is in good hands. This is how the perfect communication works in a company free of barriers.

MiniCall Center

TeleRedirecting

Infoline

gbp net

DIFFUSED CALL CENTER

without an equipment and surplus spendings.

1

Buy the number. Make the number available to the Clients so that they could easily contact your company.

2

The Client calls your number and hears the announcement and then chooses the department using the tones.

3

The Client is now connected and redirected to the chosen department.

4

You can listen to the calls later. Lintel enables relistening of the calls and controlling the employees.

Why should you get the company's call center ONLINE?

Our solutions directly determine the effectiveness of your company's employees by controlling their work, Client's satisfaction and income.

What does the call center give you exactly?

Have you ever wondered whether you can truly afford a call center? The same one you can hear when you call your bank or cell operator. You must be thinking how expensive it is. You are right! Thank to mini call center you will get what big corporations have. You will not regret the money spent. For people from ITC world this solution associates with professionalism and high quality.

You do not need any equipment.

Mini call center is a virtual solution. You just configure it from the website level and you turn the calls to other state numbers, cells or communicator installed on your employee's computer.

The best prices on the market.

Mini call center is the cheapest available solution on the market that has such an advanced functionality. Every type of center contains minute packet that you can use for the connections with your cell or state number without any additional costs starting from 56 pln net.

You need 801 number? Sure!

If you need to join 801, we will present the list of free positions. After the installation your Clients will be able to call you directly and for free.

Rise up the effectiveness of your employees and the income.

To sell you have to put the Client first. Your Client does not like to wait and wants to be treated extraordinarily and individually. One unanswered call = lost Client and lost income from selling the product. It happens very often. Rise up your income!

- ❖ Mini call center can deal with tens of Clients at the same time. Your Client will not be lost.
- ❖ Mini call center will lead him through the paths depending on your company's working hours, department or VIP Client who is the most important.

Your Client calls the call center. At the beginning, the welcome announcement is heard. Then the Client chooses the department and hears the music in the meantime. Mini call center calls to all of the people in the department due to the strategy. The call is recorded and after it is finished, you can leave the opinion about the employee to whom you were talking. An example of how does the mini call center work.

CREATE YOUR OWN INFOLINE IN 3 MINUTES ONLINE

Create the schema of solving problems. Redirect it to your consultants.

1

Your Client calls the purchased number.

2

He hears the announcement and choose the number of the subject.

3

The Client hears the answer or the consultant.

4

You can relisten to the conversation and control the employees.

What are your profits from the infoline?

Belief between the Clients about the professionalism and high quality of your company's services.

Have you ever wondered if you can afford the call center? Thank to mini call center you will get what big corporations have and you will never regret it! For IT people in today's world this kind of solution associates with professionalism and high quality. It inspires confidence to running sales and Client service.

Call the number and see how does the infoline work.

02035190340

The cost of the call is the same for the local call.

Synthesis or a Lecturer.

Your infoline can base on the synthesizer of speech IVONA used by banks, institutions and big companies. You can order a lecturer record from the voice base that we provide.

The connection with your CRM system.

Every infoline can be added to your CRM system by any number. For ex. The Client's NIP about the status of the order reducing the employees' work.

INTEGRATION SERVICES

Limtel is also a platform that enables building your own ICT solutions. Combine your ICT system with Limtel's VoiceMail.

Limtel API

TeleSteering

LimCRM

LimTools

If you think about a phone in an ICT way, Lintel is all you need!

If you think about a phone as an IT tool, Lintel is all you need. Lintel is also a platform that enables building your own ICT solutions. We were striving for making our services worldwide without any entrance costs. We have achieved the goal falling back on the modern model of distribution. SaaS (Software as a Service) enabled virtualization letting every user create, use and buy a phone application without walking away from the computer.

SaaS simplified the management application so that the user does not have to worry about the equipment management, updating, data safety or services availability. It is worth to highlight that our offer has an attractive and competitive prices.

The Lintel's platform is a combination of many complicated technologies that can be unavailable not only for an average user but for the programmer. Lack of the knowledge, financial aspects or technology stand on the way to success.

Now, every user can write its own application in a simple language in only a few minutes. Our services are available immediately. You can call us on the spot without waiting and formalities.

Query your IT system safely for ex. for an essential information

Lintel enables to query an outdoor IT systems in encrypted connection SSL. It can send lot of information to your system like the phone number of the caller, the code entered and many more. Your system can rework the data and return an appropriate Voice Sms to the system so that it could be said to your Client.

Set up Lintel's services from your IT system.

You can enrich the sales offer on your IT system and start to sell the final Lintel's services including the phone numbers. Lintel contains the full API for integrators of our services to which you have an access using XML format.

Or maybe you are you looking for an innovative solutions of interaction between people?

Lintel enables you to set up special access gates that help to use the phone as a universal pilot to any visual transmission for ex. Tv set, billboard LCD. Thank to TeleSteering solutions you will create the most leading edge event solutions.

EXTEND THE POSSIBILITIES OF YOUR APPLICATION TO TELECOMMUNICATION SERVICES.

The Limtel's platform enables you to write an effective calling service also with your IT system participation.

Use the possibilities of DialScript in a very simple way-match your system with the phone.

The Limtel's platform enables creating the programmes that can take and connect a call. They use all the servers'possibilities like play backs, a talk via synthesizer, redirecting and recording calls, building multifunctional infolines, sending text messages and e-mails. The most important advantage is to combine functionality and outdoor IT systems. During the phone call, the programme can contact your software and steer the proceedings. It enables to introduce automatic Client's service via phone keyboard for ex. checking the order status, ordering the duplicates of the invoices or logging through the phone password. To enable designing such programmes, we have created a specific programming language-DialScript. Thank to DialScript you can easily prepare a great call center ideally adapted to your needs. None of the market solutions with such a precision and individuality enables to meet the company's needs.

To find out more, download our Limtel's platform's programmer handbook here:

www.limtel.com/lim-handbook.pdf

Use our API and set up the Limtel's services automatically

Thank to a special API access key you will be able to set up a number of Limtel's services automatically. Taking advantage of the universal communication method based on the transfer XML file, the offer enables:

- ❖ setting up the TeleRedirection,
- ❖ setting up TeleOpinion bars,
- ❖ setting up Head Office,
- ❖ setting up TeleButton,
- ❖ calling from the LimVoice
- ❖ and many more.

To find out more, download our Limtel's platform's programmer handbook here:

www.limtel.com/lim-api.pdf

TeleSteering

PHONE AS A MULTIFUNCTIONAL STEERING SYSTEM

of any visual set like TV, Outdoor screen, Billboard LCD, website.

Your mobile phone as a pilot of a big Billboard.

TeleSteering is a unique service on the European Markets that enables using phones as a steering system of any visual receiver like TV set, Outdoor screen, Billboard LCD or website.

Thank to TeleSteering you can create innovative products which interact with a big group of people in public places.

An event application is created however you like

The only thing you need is a computer access. TeleSteering can transfer data to an internet application written in any programming language: Flash, Silverlight, C++, .NET, Ruby, JavaScript and even HTML5.

Even to 200 people in the same time.

TeleSteering enables creating interactive applications which disposably can use even 200 communication channels. You can create a battle on the screen.

We also prepared a hardware solutions.

If you wish to use our solution but you do not have an infrastructure, we have also provided not only equipment set solutions but also its leasehold.

An example:

On the LCD screen in the centre of the city a game comes up. Via the numerical keyboard, I steer the object on the screen gaining points. The player who gains the biggest number of the points, receives its promotional coupon on the phone in the nearest restaurant.

Would you like to see how does it work?

Check us out

www.limtel.com

TeleSteering was designed to join in the actual systems of serving the commercials on outdoor screens or corporate screens.
